Advising and Behavioral Learning Experiences

Mission:

Collaborate, support and lead agencies, districts, and families in a direction to open communication and build trust so the child is put first and receives the best possible service and program.

Vision:

Our vision is to support a learning environment for all children (3-22), parents, school district employees and agency providers. This vision is enhanced through professional development, parent education and behavioral learning experiences to children with various special needs.

Why We Do This:

- To support districts to be in compliance with Individuals with Disabilities Education Act (IDEA),
- To ensure children's needs are met with fidelity,
- To work together as a team towards a successful outcome.
- To support the limited services available through districts and agencies.
- To provide fair and neutral resolutions for special education disputes.

We work collaboratively with local and statewide organizations that offer support and legal opinions as needed.

Finding the right coach for your district or your family, means asking the right questions. Interview our company before hiring us.
